Safe • Efficient • Economical

Albany PVC Strip Doors are the most economical solution to industrial, commercial and institutional doorway problems. Controlling wind, rain, noise, dust, heat, cold, humidity, insects etc. they are inexpensive, simple to install and extremely efficient and convenient. Suitable for all internal and external applications their exclusive features include:

- EASY INSTALLATION**

Sturdy stripview aluminium head rail or the unique stripview flexi hardware is easily fixed with standard fasteners on the face or within the doorway opening.

- PVC STRIP OPTIONS**

A comprehensive range of strip sizes and overlap configurations is available according to the door size, traffic density and each individual application.

- SAFETY**

Albany PVC Strip Doors use only the highest quality PVC with crystal clarity. Our PVC strip is manufactured from flame resistant compounds and is extruded with safety rounded edges.

- PVC QUALITY**

Available in ambient (0° to +60°C) and freezer grades (0° to -45°C). Albany PVC is antistatic, UV resistant and flame retardant.

- Other PVC Uses**

Albany PVC curtains can be used not just as a barrier in doorways, they can be used to mark out an area for incoming or outgoing goods, a containment area for goods that need special handling requirements. Strip curtains can be used in many and different ways.
