

Swing View Doors

CLEAR

Super Clear fully transparent PVC Panel ensures maximum visibility, efficiency and safety.

SEMI CLEAR

A choice of translucent and clear panel sections or windows combine safety and privacy.

OPAQUE

Fully translucent panels ensure visual privacy without affecting operational integrity and safety.

Exclusive Features

The Albany Swingview Door provides safety, hygiene and environmental control in an attractive and super reliable design. Providing hands free access, Swingview is clearly the most practical and economical solution to doorway problems. Supermarkets, hospitals, warehouses, coolrooms and factories are just some of the applications that benefit from the installation of the popular Swingview Door. Design features include:

- DURABLE FRAME CONSTRUCTION**
 Constructed from architectural grade 4mm extruded aluminium sections, the stile and head is mitred, welded and braced prior to finishing with a tough, high gloss hammertone powder coating which is chip resistant, easy to clean and extremely attractive. MULTI LEAF DESIGNS for extra high doorways and HOSPITAL QUALITY option is available for silent operation.
- SUPERIOR CLOSING MECHANISM**
 A fully adjustable, double acting spring and pivot mechanism ensures reliable, secure closing from both directions. The height adjustable pivot mechanism allows easy installation and adjustments. Optional SIDE FIXING is available for cleaning and equipment access. Our HEAVY DUTY design provides double spring and pivot mechanisms for harsh service applications.
- UNIQUE PVC PANEL RETENTION**
 This ingenious design utilizes an aluminium headrail fixed to the PVC. This ensures the panel sits square in the frame eliminating distortion and sagging. SPRING CLIPS hold the PVC in the stile which automatically releases should the panel be hit near the stile. This virtually eliminates the risk of PVC panel damage by accidents. Panel replacement is fast, simple and economical.
